Summary

iOS engineer with 4 years shipping consumer and merchant products at Zomato scale, owning features end-to-end from architecture through phased rollout. Took the Restaurant Partner order acceptance flow from zero to 20,000+ orders daily across 4,500+ merchants, built a video caching layer now running in 3 production apps at an 80 % hit rate, and shipped server-driven home-screen surfaces at 100 % rollout. Mentors engineers, runs the internal iOS knowledge-sharing forum, and interviews on the iOS hiring panel.

Experience

Zomato Oct 2024 – Present
iOS Engineer (SDE II) — Consumer & Restaurant Partner apps *Gurugram, India*

- Built the Restaurant Partner Order Acceptance flow from the ground up where no prior flow existed, taking it from zero to 20,000+ accepted orders per day across 4,500+ merchant partners
- Cut the Restaurant Partner app size 41 % — 197 MB down to 117 MB, with more in review — shrinking download size for merchants on constrained devices and networks
- Built the video caching layer now adopted org-wide across 3 production apps (Zomato, District, Hyperpure), sustaining an 80 % cache hit rate via partial caching on `AVAssetResourceLoader` with `URLSession` byte-range requests
- Shipped the Lockdown Dish Craving discovery rail as a fully server-driven component; live on the Zomato home screen at 100 % rollout since January 2025, letting merchandising ship content changes with zero app releases
- Shipped merchant productivity features: on-device FSSAI licence OCR via the Vision framework for offline document capture with zero backend calls, voice-driven Reviews search via `SFSpeechRecognizer`, and a QR scanner cutting order-ready marking to a single tap
- Delivered the Lookback 2024 year-in-review, compositing Lottie animation, video overlays and per-user data into one scroll-driven flow
- Mentor 3 engineers on architecture and code quality, run the internal iOS knowledge-sharing forum, and interview on the iOS hiring panel across 14 candidate loops
- **Tech:** Swift, SwiftUI, UIKit, Objective-C, AVFoundation, Vision, Speech, Combine, Lottie, Xcode, Instruments

LikeMinds Aug 2023 – Jun 2024
iOS Engineer — SDK Platform *Gurugram, India*

- Core contributor to the open-source iOS Feed SDK (31,000+ lines, 224 Swift files): a plug-and-play social feed with infinite scrolling, pull-to-refresh and media caching, built for drop-in third-party integration
- Shipped Topic Feed end-to-end — selection screen, universal-feed integration and reusable UI components — letting host apps filter a feed by topic without custom code
- Modularised the SDK into standalone widgets (feed list, post detail) so integrators could adopt single components instead of the full framework
- Owned 5 public releases from v1.0.0 to v1.3.0, defining the CocoaPods versioning strategy and automating publishing through GitHub Actions to remove every manual release step
- Built the Chat SDK with full offline support via local persistence and sync-on-reconnect, preserving message delivery through network loss
- Cut SDK memory footprint and feed scroll frame drops through image-cache tuning and cell reuse fixes; fixed media upload failures under iOS limited photo-library access
- **Tech:** Swift, UIKit, URLSession, CocoaPods, Swift Package Manager, GitHub Actions, Xcode

TravClan Aug 2022 – Aug 2023
iOS Engineer *Gurugram, India*

- Led iOS development of the Hotels product on VIPER, shipping search, booking and payment flows as the sole iOS owner of the vertical
- Built the KYC module for travel-agent identity verification and regulatory compliance, and raised crash-free sessions by fixing recurring crashes and memory pressure
- **Tech:** Swift, UIKit, VIPER, Xcode, Instruments

Languages & Technologies

Swift, Objective-C, **SwiftUI**, UIKit, Combine, AVFoundation, Vision, Speech, Core Animation, Lottie
Server-driven UI, modular SDK design, VIPER, MVVM, async/await, GCD, REST APIs, Codable
Xcode, Instruments, Git, GitHub Actions, CocoaPods, Swift Package Manager

Talks & Community

Speaker — Apple Developer Center July 2025

- Represented Zomato at the Apple Developer Center; delivered a talk on iOS 26 adoption strategy to 30+ iOS developers

Education

Maharaja Surajmal Institute of Technology 2022
B.Tech, Information Technology — CGPA 8.5/10 *New Delhi, India*
